RE: MINING AND RECLAMATION PLAN
ST. GEORGE MINING CORPORATION
APEX MINE, WASHINGTON COUNTY, UTAH

Dear Ms. Boucek:

The following data and additional information are provided in response to the Division's review and comments dated March 29, 1984, on the permit application for the Apex Mine.

1) Rule M-3(1)(b) - Permit Boundary Delineating Interior Limits
of the Affected Land

The permit boundary has been delineated on Maps SP-1 and SP-3 furnished in this reply.

2) Rule M-3(1)(d) - (a) Transmission Lines, (b) Diversion Ditches

- a) Transmission lines owned and maintained by Utah Power and Light cut across the Apex Mine permit area (see Map SP-1). These are permanent lines to a microwave station. Power is presently supplied to the mine site; this line takes off from the UP&L line and enters the proposed permit area from the east along the access road and terminates at a station to the north of the portal entrance as shown
